THE SYSTEM

A Shower Without Grout Lines

Wall panels and pan are cast in cultured marble and installed as a set: three wall pieces over the studs, one pan on the floor. No tile, no grout, no waterproofing membrane to build up on site.

3	11	96”	12
WALL PIECES PER SHOWER	PAN CONFIGURATIONS	MAXIMUM WALL HEIGHT	COLORS & FINISHES

Nothing to grout

Panels meet in a sealed joint instead of a grout line, so there is no porous seam to scrub, discolor or re-grout later.

One-day install

A crew sets the pan and three panels in a single visit. Tile setting, curing and sealing disappear from the schedule.

Pre-leveled pan

The pan is cast with its slope and drain position built in — center, left, right or trench — so the floor drains without a mortar bed.

Matching accessories

Soap ledges, corner shelves, foot rest and trim strips are cast in the same color as the panels, not bolted on afterwards.
